SIMULCAST TECHNOLOGIES - CORPORATE PROFILE

Official Enterprise Documentation - Simulcast Technologies Pvt. Ltd.

1. About The Company

Simulcast Technologies Pvt. Ltd. is Nepal’s premier broadcast engineering and telecommunications provider. Headquartered in Kumaripati, Lalitpur, Simulcast operates mission-critical infrastructure across 7 provinces. We design, build, and maintain national FM networks, DVB-T2 digital television, OTT/IPTV, and fiber links.

2. Core Products and Solutions

- RF & Digital TV: High-power FM and DVB-T2/ISDB-T transmitters, antenna combiners, STL microwave links.
- Cloud & On-Prem Playout Automation: 24/7 master control, CG graphics, video servers, multi-format transcoding.
- Optical Fiber & ISP Infrastructure: GPON/XGS-PON OLTs, core routing, DWDM, and subscriber management.
- Custom Enterprise Software: SIMUL billing engine, ISP CRM, telemetry monitoring, and automation bots.
- Model Context Protocol (MCP) AI Agents: Integrated enterprise workflows, multi-channel automated communications.
